

JOSEPH ETIM

Product Engineer | React, Next.js, TypeScript, React Native | Performance, UX & AI-Automation | 6+ Years Experience

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 6+ years of experience leading and stabilizing production systems across SaaS and platform environments. Strong focus on architecture, system reliability, and performance optimization. Proven ability to identify high-risk failure points, make pragmatic technical decisions, and deliver scalable, maintainable systems under real-world constraints.

SYSTEMS AND TECHNICAL LEADERSHIP

- Led architectural decisions across production systems handling critical user flows
- Identified and mitigated high-risk failure points in transactional and session-based systems
- Designed deterministic state management and data flow strategies
- Balanced delivery speed with system correctness, reliability, and maintainability
- Worked closely with product and stakeholders to align technical decisions with business outcomes
- Prioritized high-leverage work and avoided premature complexity

TECHNICAL SKILLS

- ❖ **Languages and Frameworks:**
 - JavaScript (ES6+), TypeScript, React, Next.js, Vuejs, React Native, Node.js
- ❖ **System Design & Architecture:**
 - State management, data flow design, multi-tenant considerations, scalable frontend architecture
- ❖ **Performance & Reliability:**
 - Core Web Vitals, Lighthouse optimization, production debugging, system stabilization
- ❖ **Integration & APIs**
 - REST APIs, third-party integrations (payments, services), error handling strategies
- ❖ **Engineering Practices**
 - Refactoring legacy systems, debugging production issues, cross-browser reliability, unit testing
- ❖ **Collaboration & Delivery:**
 - Cross-functional collaboration (product, backend, QA), translating Figma into scalable systems

PROFESSIONAL EXPERIENCE

Frontend Lead

Access Skills, United Kingdom (Remote) - <https://www.accessskills.co.uk>

- Led frontend performance and SEO recovery for a production SaaS training platform
- Diagnosed Core Web Vitals, accessibility, and crawlability issues impacting rankings and conversions
- Implemented performance optimizations and semantic improvements aligned with Lighthouse metrics
- Partnered with stakeholders to align technical improvements with business and SEO goals

Impact

- Improved Lighthouse scores from ~60 –76 to above 90(Performance, SEO, Accessibility, Best Practices)
- Increased competitiveness for high-intent search traffic
- Established performance baselines to prevent regression

Lead Frontend Engineer

ShopazHub, Nigeria (Remote) - <https://www.shopazhub.com>

- Led architectural stabilization of a revenue-critical e-commerce platform
- Identified systemic risks across checkout, session management, and third-party payment integrations
- Designed deterministic cart reconciliation logic for guest and authenticated users
- Refactored checkout flow into explicit, controlled state transitions
- Integrated BNPL payment system with safeguards for failure scenarios
- Collaborated closely with backend engineers and designers on API contracts and UX flows

Impact

- Reduced checkout failures and cart abandonment
- Improved payment reliability and user trust
- Increased guest-to-user conversion without data loss

Frontend Lead/Product Consultant

Mortified, Nigeria (Remote) - <https://www.themortifiedone.org>

- Leading frontend architecture and UI implementation for Mortified's web platform.
- Consulting on frontend strategy and UX for an upcoming mobile application launch
- Collaborating with product and design teams to translate concepts into scalable, user-friendly interfaces.
- Advising on performance, component structure, and frontend best practices to support future growth.

Web App QA/Frontend Consultant (Contract)

Qcmology, France (Remote) - <https://www.qcmology.net>

- Ensured cross-browser consistency for complex text interaction systems
- Diagnosed and resolved Safari-specific rendering and behavior issues

- Tested and validated dynamic content handling and interaction flows
- Worked closely with engineers to reproduce and resolve production defects

Impact

- Improved cross-browser reliability (especially Safari)
- Reduced production bugs affecting user experience

EDUCATION

Bachelor of Engineering (B.Eng) HONORS
University of Uyo

CERTIFICATIONS

- [Programming with JavaScript — Meta](#)
 - [React Native — Meta](#)
 - [Foundations of Project Management — Google](#)
 - [Data Analytics - IBM](#)
 - [Project Management - IBM](#)
